WHAT IS IMPART?

IMPART is developing a decentralized application (**DAPP**) on the **HEDERA HASHGRAPH**, providing a platform where creators of all types—including musicians, digital artists, filmmakers, podcasters, authors, and more—can seamlessly upload and monetize their work.

Users of the DApp can stream, view, listen to and shop these creations - supporting those creatives in the process.

The DApp will have express tools which allow artists and fans to connect with each other in new ways thanks to the technology available on the Hashgraph.

The primary role of this DApp is to function as an all-in-one creative platform which does not discriminate between artists based on their popularity level, but rather aims to give all creatives on the platform equal standing - using algorithms which prioritize user interest, with a heavy focus on curation. Creatives will also receive a fair portion of all streams & sales, unlike most traditional platforms.

The Impart DApp will run like any other standard creative application (such as Spotify, Netflix, Audible, etc. in terms of user experience; with fiat as the primary payment method - however there will be the option to utilize two tokens on the platform which provide additional benefits such as exclusive access, discounts & more. These two tokens are the **IMPACT** token, which is the native token of the Impart ecosystem, and the **TRASH** token, which is the official memecoin of the Impart ecosystem.

TOKENIZATION

The Impart DApp will allow creatives to tokenize themselves as NFTs, representing benefits in themselves as creatives on the DApp. They will also be able to tokenize their creations. Through these tokenizations - fans will obtain unique and exciting benefits by investing in these NFTs

Impart aims to utilize the technology of platforms such as **KABILA** - an all-in-one NFT & token creation suite on Hedera - in order to facilitate the underlying elements of tokenization on the DApp

WHY HEDERA?

HEDERA is a next-generation Web3 network comparable to Bitcoin, Ethereum, and Solana, yet distinguished by its proprietary Hashgraph consensus mechanism. Rather than relying on a conventional blockchain, Hedera employs a Directed Acyclic Graph (**DAG**) and a “Gossip About Gossip” protocol, enabling near-instant finality, exceptional speed, and robust scalability. This unique approach—combined with sharding—allows the network to handle hundreds of thousands of transactions per second at fixed, predictable costs. Consequently, DApp users can create and transact an infinitely scalable range of digital assets in real time, ensuring content creators and rights holders benefit from revenue streams such as plays, downloads, and purchases almost immediately.

IMPART CREATOR PROGRAM

In addition to the DApp, Impart is tokenizing select artists on the Hedera Hashgraph to elevate their brand presence and empower them to create exceptional art—while ensuring they receive fair compensation for their work. By minting NFTs that represent both the artists and their creations, Impart offers these tokens to fans and the wider community. Holders gain exclusive perks, such as private access to chats with artists, airdrops of future digital assets, and premium merchandise—ranging from fashionwear and vinyl to figurines—tailored to each creator’s unique style.

This process is guided by expert artistic managers, who oversee the production of the **IMPART CREATOR PROGRAM**

A FAIR ECOSYSTEM

Traditionally, many existing platforms capitalize on artists’ creativity by demanding disproportionate shares in their work or dictating creative choices that align more with business agendas than authentic expression. In contrast, Impart champions artistic freedom, enabling creators to follow their own vision while earning fair and meaningful compensation.

THE IMPART INO

Impart is launching an **Initial NFT Offering (INO)** in order to raise funds to begin the design of the Impart DApp. Holders of the **IMPART INO PASS** will receive an airdrop of Impact tokens upon launch of the **IMPACT TOKEN SALE**. They can also hold their NFT to receive future benefits such as airdrops of Impart digital assets, exclusive plaza access & more. 10% of all **\$IMPACT** tokens released will be airdropped to holders of the NFT.

TREASURY & TEAM: TBC (10%)

TAX: 1% BUY, 1% SELL

THE TOKEN

The **IMPACT** token is the native token of the Impart DApp & ecosystem. Its function is manifold:

- Holders of certain amounts or more Impact tokens receive airdrops of select Impart NFTs
- Holders of the token receive staking rewards plus additional benefits while staking their Impact tokens
- Holders of the token can choose creatives to "Impact" while staking, granting them a percentage of their staking rewards
- Holders receive express benefits on the Impart DApp
- The token is used for tips on the Impart DApp
- Additional functionality is being explored for the token - it will be deployed on a developable smart contract
- There is a 1% buy & sell tax on the token to prevent quick trades and to promote holding; which will be split five ways:
 - 0.2% to **IMPART TREASURY**
 - 0.2% for marketing
 - 0.2% for staking rewards
 - 0.2% for the Impart Creator Program
 - 0.2% for **\$TRASH** buy backs (**50% Permanently Burned**)

ROADMAP

FEB 16TH

2025

MARKETING BEGINS

Impart features on Genfinity and marketing for INO begins

MARCH 2ND

PRIVATE ROUND 1

Impart launches INO with 100 exclusive NFTs available for 1000 HBAR Each. People on the whitelist can buy 1 NFT each on Kabila

MARCH 3RD

PRIVATE ROUND 2

INO Private sale continues if there are any NFTs left over after round 1. Each person on the whitelist can purchase up to 5 NFTs each

MARCH 9TH

PUBLIC ROUND 1 (ROUND 3)

Anyone can purchase any left over NFTs from the initial 100 if they don't sell out in the first two rounds on SentX & Kabila

MARCH 10TH

TRASH ARTISTS INO MARKETING

Marketing begins for Trash Artists INO, to be launched on April 6th, including the whitelist

2025

APRIL 6TH

TRASH ARTISTS NFT SALE

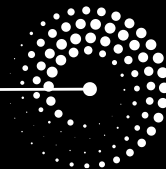

Trash Artists launches 100 unique NFTs on the Hashgraph exclusively to whitelisted individuals, with the same round structure to the Impart INO.

APRIL 13TH

PUBLIC SALE

Any NFTs unsold in the first two rounds become available to the public

APRIL 14TH

DEVELOPMENT BEGINS

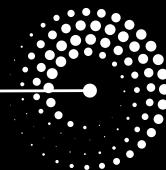

Impart begins developing mockups for their DApp on the Hashgraph using the funds raised in the INO to sustain the project

TBC

APP MOCKUPS COMPLETE

Impart completes app design and sends mockups to developers for developer timeline

TBC

APP COMPLETE

Impart completes the development of the Impart DApp and prepares for release
